

4 Benefits of Essential Onboarding

Essential Onboarding includes a mixture of computer-based training and live working sessions. The online IriusRisk Academy is leveraged to deliver essential training on threat modeling, platform setup, and fundamentals for end-users and admins. Following the completion of the training, an IriusRisk engineer will be assigned for working sessions to assist with any questions or live threat models. This onboarding also includes 10 customized components and 1 custom API integration.

1. Just in Time (JIT) Computer-Based Training

Training that's based on their role and at their pace. This helps distributed teams to get up to speed in new concepts and tooling quickly and efficiently.

2. Working Sessions

Working sessions are designed to enforce key product concepts with live examples. Customers come with a diagram and leave with a full threat model.

3. Custom Components

Customers in this onboarding track get access to 10 customized components to be consumed in their threat models.

4. Custom API Integration

Customers in this track can request 1 custom API integrations to meet their unique requirements.
